About this edition. The Monthly Pulse is a templated shell - the editorial team replaces each placeholder with that month's reporting before distribution.

THE MONTHLY PULSE

September 2025

Replace each placeholder with the month's reporting before publishing.

01

From the Editor

[Add content] One paragraph framing this edition.

02

FDA & Global Regulatory Watch

[Add content] Notable FDA premarket cybersecurity guidance updates, eSTAR changes, EU MDR / NIS2 movement, Health Canada / TGA / PMDA notices.

03

Threats, Vulnerabilities & Advisories

[Add content] CISA medical device advisories, CVEs affecting common MedTech components, and vendor coordinated-disclosure highlights.

04

Inside Blue Goat Cyber

[Add content] New publications, podcast episodes, conference talks, awards, and tooling or methodology updates this month.

05

Recommended Reading

[Add link] Standout post from /blog or /guides

[Add link] One external must-read (FDA, NIST, MITRE, MDIC, AAMI...)

[Add link] One practical checklist or template

06

What we're watching next month

[Add content] Upcoming guidance milestones, conferences, open comment periods, and anything on the horizon worth preparing for.
